

To whom it may concern :

I am writing to highly recommend Lehaci Ronaldo George for a position in the game development field. As Ronaldo's instructor during their time at XAMK South-Eastern Finland and Cambridge Academy of Digital Games and Innovation's Games Development course, I had the pleasure of witnessing his growth and development as a game developer.

Throughout the course, he displayed exceptional interest, motivation, and passion for the subject matter. They consistently demonstrated a strong understanding of game development principles and were able to apply that knowledge to create innovative and high-quality projects. Ronaldo was particularly skilled in C# programming language and Unity game engine, their proficiency in these tools was evident in their work.

In addition to their technical abilities, Ronaldo also excelled in teamwork and collaboration. He has achieved multiple award badges, such as the "Timely manner" achievement, meaning he has completed a minimum of 15 ECTS of the course modules within 4 months of the registration, "Fantastic quality and interest, given to students who demonstrate a high level of interest, motivation, and passion, and have produced work that is both novel and of high quality.

He was also one of the few students who accepted having his work submitted as an example for the other students at XAMK, earning him the "Helping fellow students" achievement.

One of the most remarkable projects that he worked on during the course was during module 18, "Game concept design", where he forwarded excellent quality deliverables about a self-made video game concept and a thorough original character design, which he agreed to let us use as an example for his fellow students.

I am confident that Ronaldo will be valuable to any software development team. I highly recommend Lehaci for any opportunity in the field and would be happy to provide any additional information if needed.

Sincerely,

Dr. Jan Henrik Storgårds
